3. You are missing the texture files of an NPC, that should only show up if they are in your inventory or world map.. 4. Not installing the mod or DLC 5. The Modder doesn't have the permissions to work with their mod!.. 2. Some mods/packs are buggy, try searching for the folder/mod in your main Skyrim Data folder using the search function in the dropDown menu.

A) An external problem: You cannot access /activate items/weapons/armor/moves/spells that the game is currently using at this time (eg: Skyrim.esm can be used as a reference for finding this issue).. 9. If you have any issues with a game crash or loading screen, do NOT use mods which remove mods. They should always be used in conjunction with the game when needed. The most common problems are:.. To get a more realistic look, try changing texture resolution in the mods settings and then in the game if this isn't fixed for you.

All you really need to do is install the mod or the mod pack, restart your game and everything should work out fine once the modding has cleaned yourself up. If your PC crashes right after any of the above, you will need to restart and try again with a new file.. B) A memory problem. These are probably caused by an error running certain parts of your Skyrim installation or memory leak during the installation. See above.
