About This Game

From the creator of the Gundemonium Collection comes a thrilling new 2D action-platformer! Help Bunny escape the Devils' Labyrinth and defeat the 7 Devils in this hilariously over-the-top action-platformer game. Battle through a large, connected map filled with unique enemies, traps, and puzzles. Use magical items like the Sylph Shooter and the Hyper Heels to power up and defeat the 7 Devils. Manipulate the fabric of time to solve puzzles and survive. Will Bunny be rid of those new ears she so despises? Only with your assistance can she brave this dangerous maze...

Key features:

- Beautiful hand-drawn 2D graphics
- Over-the-top comical style with a charming storyline
- Play through 7 dangerous areas and battle 7 powerful Devils
- 2 versions: Choose between the original graphics or new remixed sprites
- Acquire magical items, new abilities and manipulate time to solve puzzles
- A new arranged soundtrack by Woofle (Gundemonium Collection), alongside the original
- Full arranged soundtrack in high-quality MP3 format for listening outside of the game
- Japanese language support now available!

Immersive, gripping and fuc*ing terrifying.

. Total buggy mess. What should I expect when Ubisoft is on the job?

Never again.. 1-sim dating

2-exploring

3-challengers coming at you from all side just becuse your a leagandary hero whom stuck at level 1 with a curse

4-random dongons with random loots and bounty monster scattered around

5-girls summoning stones collectables[got to catch them all]

6-town leveling

7-looooooong game the story keep on expanding tricking you into thinking that its over
and more

the only gribe i have is the saving system

i have to go back to the tarevan to save. This game really does have a lot of potential - the gameplay is pretty fun and the "story" makes you want to save your pup (but trust me, it still isn't much of a story). However, there's a catch, one that I didn't know of when I bought the game - beating it only takes about 15-25 minutes. I know, I know. That's pretty short. If you want to take the time to get all of the achievements it'd last a lot longer, 15-25 minutes is supposed to be the minimal length of a mission in games, not the length of the entire game.. As someone who grew up hanging around arcades, it's definitely a treat to be able to revisit the classics in VR. There's nothing quite like hanging out at the arcade, soaking in the atmosphere and just relax.

Not having to spend actual quarters, silly enough, is a huge plus.

If you turn on collision mode you will lose your friends. I am contemplating murder on a few of mine ATM.

♥♥♥♥ you Matt. Xmas Shooting - Scramble!! is a cute anime bullet hell game from the OJ franchise. Unlike QP Shooting, this game only has 3 stages, but for the price, You still get a lot of challenge and fun. (and a character unlock for 100% OJ <3)

Even if you are not a fan of cute anime moe stuff, this game is still great for fans of quick-reflex and other bullet hell type games.

This game delivers exactly what you should expect from OJ, and I love it :). Wayward Manor is a puzzle game, where you play as a ghost of sorts and try to chase the inhabitants out of their gothic manor. It is also very much a mobile style game: you need to get six "scares" per level, and you get more options to interact with the room as you scare the person or persons more times. Each level also has three optional objectives to get.

There is therefore replay value if you want a perfect run. The characters each have a distinct personality which makes them unique, and what ties the individual levels together is a short story written for this game by none other than Neil Gaiman.

As for the graphical style: it is based on drawings from the Victorian age, such as used in the original publications of Alice in Wonderland. This means superdeformed yet "cute".

The game is easy to get through, but can be really challenging if you want to perfect it.

It's not a perfect game, I encountered a few minor glitches, but none of those really detract from playing. But my overall experience is a very positive one.. It's not a bad "solve this" game. Just a little simplistic and slow paced. Not a bad game for kids though.

The english cosy setting has a nice appeal.. No no no... just no. This is a \$5 DLC that contains almost NOTHING. The "new" faction is a retread of the humans, and the other two "new threats" ARE NOT PLAYABLE FACTIONS! What a waste of time! Campaigns interest me not at all, I want new ship parts (got some of those), new factions (not really), new ship styles (one), and new gameplay (none). Basically, \$5 isn't much, but you could totally pass this up unless you are an avid player. And, with a few more DLCs like this, there will be fewer of those around, thinks I.... Not bad for a CHEAP game.
